Runabouts

Recalling runabouts of the past, our 14, 16, and 18 foot runabouts feature handcrafted workmanship. Combined with modern day materials, they present a hull requiring low maintenance while retaining its traditional style. Coated with durable West System™ Epoxy and fiberglass these craft will not only last, but will look stunning for years to come. A semi-planing displacement hull will run economically and efficiently reaching max hull speeds with less power.

The 14’ and 16’ Sport Runabouts (Item A1 and A11) is an ideal craft for small and medium-sized lakes while the larger 18’ Runabout (Item A2) is deeper with ample walk-around interior space - perfect for larger loads and big lake cruising.

While the base hulls are standard, each model is custom-built to your needs, such as seating and decking arrangements. The result is a boat that is built and designed specifically for you while maintaining safety, performance and durability.

**Standard features** include decking, a protective keel, floor boards, rub strips and splash rails. Options include steering, electrical bilge pump, navigational lighting, chrome or bronze hardware, extra hull depth, windshield brackets.

**Optional finishing** both models are available unfinished without varnish, epoxy and fiberglass. This option offers a choice of decking, hull depth and seating arrangements and allows you to finish the boat yourself. We can also help with the process and provide the appropriate materials to complete your craft.

Also available are 12 and 14 footers of various beam widths and hull styles to match your particular lake conditions.
